EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lionel N. White and Dr. Thaddeus Prusik on 12/06/04.

The application has been amended as follows:

In claim 1, in the preamble of the claim:

after "reactivity of a" insert -- distinctively crystalline structured --;

after "monomer component" insert -- of a --,

after "system composition" insert -- , --, and

after "which" insert -- method --;

at the end of the claim insert -- while having substantially retained said crystalline structure --.

In claim 7, at the end of the claim: insert -- according to the method of claim 1 --.

In claim 12, at the end of the claim insert -- according to the method of claim 1 --.

The following is an examiner's statement of reasons for allowance: the closest prior art of Patel (US 4,208,186, US 4,228,126, US 4,276,190) or Ivory (US 4,298,348), which teaches changing forms of diacetylenic monomer component of the shelf-life monitoring system from inactive to active by recrystallization from melt, vapor or solution, specifically indicates changing crystalline form of the monomer component. Thus, the instant invention is distinct from the prior art, since the monomer component of the instant invention retains its crystal structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
